

# Ashok Baghele

## Solution Architect

 [ashokbaghele@yahoo.in](mailto:ashokbaghele@yahoo.in) |  (+91) 8319924486

 Pune, India | [LinkedIn](#)

**Total Experience:** 12+ Years

## Profile Summary

Skilled in AWS & GCP, IBM FileNet, IBM Case Manager, IBM Enterprise Records, IBM Content Navigator, Dojo, Java/J2EE, Microservices, Docker & Kubernetes. Strong IT professional with a bachelor's degree in computer science from Bansal Institute of Science and Technology, Bhopal. Experienced in Big Data platforms (Spark, EMR, Dataproc), Kafka, and modern visualization tools. Recently delivered **Agentic AI solutions** for dashboard migration, automated testing, and SEO optimization.

## Key Skills

- **Cloud & Big Data:** AWS, GCP, EMR, Dataproc, Spark, Databricks, Snowflake
- **Messaging & Streaming:** Kafka, Pub/Sub, SQS, SNS
- **Enterprise Content Management:** IBM FileNet, Case Manager, Enterprise Records, Content Navigator
- **Development:** Java, Python, Spring Boot, Microservices, Vue.js, Angular, Dojo Toolkit
- **DevOps & Infra:** Docker, Kubernetes, Terraform, GitOps, Jenkins, Flux, Nexus, JFrog
- **Architecture & Design:** Solution Design, Technical Design, API Integration, Agile Delivery
- **AI/Automation:** Agentic AI (dashboard migration, testing automation, SEO optimization)

## Education

- **B.Tech (Computer Science)** – RGPV, Bhopal (2012)
- XIIth – English (2008)
- Xth – English (2006)

## Work Experience

**Impetus Technologies** – *Module Lead Software Developer*

*Oct 2022 – Present*

- Java Developer with Spark, Big Data & AWS experience.
- Designed AI agents for **Tableau → Superset dashboard migration**, reducing manual rework.
- Built **Champion–Challenger Testing Agent** for defect detection, fix validation, and comparative analysis.
- Delivered SEO optimization tasks for enterprise applications, improving visibility and performance.

**Cognizant** – *Senior Associate*

*Oct 2018 – Oct 2022*

- Developer in FileNet P8, ICN, IER, Java/J2EE, DevOps & Cloud.
- Led integration of ECM systems with cloud-native services.

**Capgemini** – *Consultant*

*Nov 2016 – Oct 2018*

- Senior Java & FileNet Developer.
- Delivered scalable ECM solutions for enterprise clients.

**Datamatics Global Services** – *Associate Consultant*

*Jan 2016 – Nov 2016*

- FileNet Developer handling requirement gathering, coding, and business user interaction.

### **Tata Consultancy Services – Systems Engineer**

*Jan 2013 – Jan 2016*

- FileNet Developer.
- Implemented multiple ECM solutions and environment setups.

## **Projects**

### **OneTru Product Development (639 Days)**

Build a product which offers various functionalities like Data Onboarding in AWS Datalake Account, Cluster Management, Cost and Billing.

**Cloud Services:** EMR, S3, IAM, EKS, KMS, Glue, AMI, EBS, SNS & SQS, HSM & AWS Vault, RDS, Athena, SageMaker

**Technology:** Spring Boot, VueJS, Spark, Python, Scala, GitOps & DevOps (Bitbucket, GitLab, JFrog, Nexus, Jenkins, Flux, IAC Terraform, Splunk)

### **Document Hub Product Development (730 Days)**

Developed a product for document management with ECM functionalities like IBM FileNet, Documentum, Newgen OmniDocs.

**Cloud Services:** AWS S3, EC2, OpenStack, IAM, Lambda

**Technology:** Java, Spring Boot, Microservices, Angular, MongoDB, Splunk, GitOps & DevOps, Bitbucket, Jenkins, Nexus, Docker

## **PRMS (Physical Record Management System) (639 Days)**

Record Management System for physical records with compliance and archival features.

## **CWT Process (153 Days)**

Credit flow management in Bank based on IBM Case Manager.

## **FileNet & ICN Development (546 Days)**

Performed various development tasks including FileNet environment setup and customizations.

## **Agentic AI & SEO Projects (Recent)**

- **Dashboard Migration Agent:** Designed and deployed an AI agent to automate migration of **Tableau dashboards to Apache Superset**, ensuring seamless visualization continuity and reduced manual effort.
- **Champion–Challenger Testing Agent:** Built an agent for **automated defect detection, fix validation, and comparative analysis** between champion and challenger models, improving release quality and reducing turnaround time.
- **SEO Optimization Tasks:** Applied AI-driven analysis to optimize **search engine visibility** for enterprise applications, including metadata structuring, keyword alignment, and performance monitoring.
